The college curriculum is oriented to booster the scholastic physical, emotional, social and cultural needs of the student. The practice of value oriented process acts as a nucleus around which all our college activities revolved. We are very conscious of the fact that emotional stability plays a very significant role in the healthy growth of a students. One of the important tools to achieve this is through more interaction and one to one rapport with our students. This open and interactive approach also helps in discovering and strengthening inherent talent in the student in all field. All our college activities are based on a participatory spirit that reduces the inhibition levels of the students and thus assists the students in becoming aware of their potential.

Further we have also given a chance to bright candidates to take up the course
